MR. BERT®

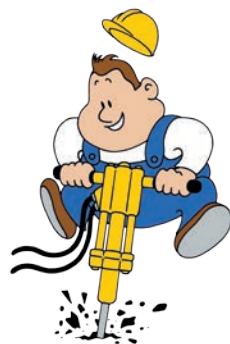

May I introduce myself? My name is Mr. Bert. Workwear is not only supposed to be functional and comfortable, it is also meant to make you happy. As an expression of high quality work it is also an ideal vehicle for CI. I am going to accompany you on 62 pages with the new James & Nicholson and myrtle beach Workwear catalogue presenting to you the latest products.

OEKO-TEX® STANDARD 100

OEKO-TEX® standard 100 is an independent testing and certification system for all processing steps of textiles. It is prerequisite for the certification of textiles according to OEKO-TEX® standard 100 that all the components of an article conform unflinchingly to the required criteria - apart from the shell this applies also e.g. to sewing threads, padding, imprints, etc. as well as non-textile accessories, such as buttons, zips, studs, etc.

The testing for harmful substances comprises:

- a) substances prohibited by law, b) legalised substances, c) chemicals known to be harmful, however not yet regulated by law, d) parameters for health care. The requirements of testing for harmful substances as a whole go beyond existing national laws.

Laboratory tests and product classes:

OEKO-TEX® testing for harmful substances is always defined according to the actual use of the textile. The more intense the skin contact of a product, the more stringent requirements regarding human ecology it has to meet.

There are four product classes:

- Class I:** textiles for babies and infants to the age of three (clothing, toys, terry products, etc.)
- Class II:** textiles with skin contact (underwear, bed linen, T-shirts etc.)
- Class III:** textiles without skin contact (jackets, coats, etc.)
- Class IV:** decoration articles (curtains, tablecloths, covering for upholstery, etc.)

WORKWEAR FUNCTIONS

WATER COLUMN

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

CORDURA®

CORDURA® is a very sturdy, textured polyamide fabric, which is extremely tear- and abrasion-proof. Special yarns, specially developed weaving techniques, dyeing methods and additional textile finishing ensure that products with CORDURA® can be used as durable and comfortable workwear.

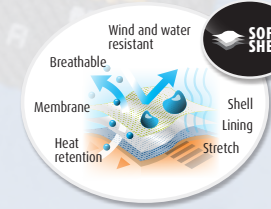

BREATHABILITY / PERMEABILITY TO VAPOUR

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

SOFTSHELL

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

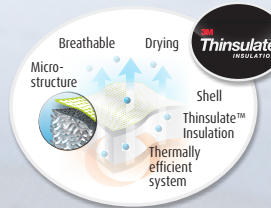

UV-Protection

Textiles with the symbol UV-protection are characterized by sun protection comparable to the protection of a sun-screen. The information is given in UPF (UV-protection factor). This indication implies the factor by which the length of time spent in the sun can be extended without getting sunburnt. It is calculated in the same way as the sun protection factor of a sun-screen.

Thinsulate™ INSULATION

The light-weight thermal insulation affords optimum protection against cold despite its minimum thickness. It even keeps you warm in damp or wet conditions. Thinsulate™ INSULATION offers excellent comfort and allows optimum room to move. It is extremely breathable, durable and easy-care.

Caps for printing

Caps with this label are ideal for printing and embroidering. The construction of the caps leaves a lot of space so the cap is easy to decorate, with the logo presented to perfection.

CoolDry®

Due to the CoolDry® finish moisture is transported to the outside and creates a comfortable feeling. The textiles dry quickly, are breathable and ideal for all activities.

coldblack®

Textiles with a coldblack®-finish afford optimum protection against heating up through sun rays. They stay cooler and protect reliably against UV rays (min UPF 30). The effect of this is that the person wearing these garments does not sweat so easily, feels better and is even more efficient. coldblack® is a registered trademark of Schoeller Technologies AG, Switzerland (patent pending).

MB 036 Neon-Reflex-Cap

- Functional 6 panel cap in loud neon colours
- 2 embroidered ventilation holes
- 4 stitching lines on the peak
- Contrasting piping around the cap
- Laminated front panels
- Padded satin sweat band
- Reflective velcro fastener and border around the peak A
- Outer fabric: 100% polyamide
